## WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793, 794, and 798. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive communications intelligence and TALENT-KEYHOLE information. Its security must be maintained in accordance with COMMUNICATIONS INTELLIGENCE and KEYHOLE and TALENT regulations. No action is to be taken on any communications intelligence which may be contained herein, regardless of the advantages to be gained, unless such action is first approved by appropriate authority.

# SOVIET AIR DEFENSE CONTROL CENTERS, [redacted]

This report was prepared in response to a National Security Agency requirement calling for the identification and location of control centers and outstations serving the Soviet Air Defense Data Transmission System, [redacted]

25X1A

The search proved negative insofar as [redacted] stations are concerned. Many previously unreported electronic sites were found, but none of these could be identified with [redacted]

25X1A

25X1A

It is believed that the small scale and low resolution of the photography are mainly responsible for the negative results. The facilities that were detected for the first time--for example, the Gor'kiy and Buy Trapezoidal Sites--are major in size and appear on photography that has a high resolution. It is believed therefore, that as the scale and resolution of KEYHOLE photography improve, [redacted] sites will be identified.

25X1A

25X1A

The search for [redacted] sites was conducted over an extended period of time. All suspect areas appearing in photography from KEYHOLE [redacted]
